Thomas Buschatzke, Director
Arizona Department of Water Resources

Ted Cooke, General Manager
Central Arizona Water Conservation District

Dear Director Buschatzke and Mr. Cooke:

RE: Statement of the Board of Directors of the Arizona Municipal Water Users Association regarding the Lower Basin Drought Contingency Plan

As the Board of Directors for the Arizona Municipal Water Users Association (AMWUA), we state the following positions regarding the Lower Basin Drought Contingency Plan:

AMWUA agrees Arizona should implement the Lower Basin Drought Contingency Plan (LBDCP).

- AMWUA recognizes the growing risk that historic drought and the structural deficit have placed on our vital Colorado River supplies.
- AMWUA understands that to reduce the risk to the Colorado River through LBDCP, we must accept earlier and larger cuts to our water supplies than under the existing 2007 Interim Guidelines as well as bear greater costs for our water delivered by the Central Arizona Project. This is most evident with Non-Indian Agriculture (NIA) Priority water not being available in a Tier 2 shortage under LBDCP.
- Municipalities with contracts for Non-Indian Agriculture (NIA) priority water face significant cuts under LBDCP. Those municipalities must be able to maximize the use of that water while it is accessible for the benefit of their citizens who invested in it.

The LBDCP must be implemented in a way that does not weaken AMWUA's members' federal contract rights or their ability to manage their water. These ground rules have provided the context in which for decades our members have planned and invested for water security and resiliency on behalf of their residents and industries.

AMWUA will unequivocally challenge any attempt to restrict or undermine our members' ability to use their water for the benefit of their ratepayers, including the ability to store their Colorado River water and reclaimed water underground; any attempt to do so would preclude our ability to support the implementation of LBDCP.

Arizona Municipal Water Users Association

The LBDCP must be implemented in a way that respects the CAP priority system and does not add additional risk to higher priority contracts.

- Since Arizona will be experiencing its first Colorado River shortage, precedent will be set by the actions taken and it is critical we get it right.
- AMWUA cities have offered voluntary, positive and transactional solutions to assist the implementation of LBDCP in Arizona that respect the priority system.

The final implementation package for LBDCP in Arizona must strengthen Arizona's Colorado River supply while not weakening our long-term water management, which is the foundation of Arizona's economy and the quality of life for its current and future citizens.

Respectfully,

Mayor W.J. Lane, President
City of Scottsdale

Councilmember Eddie Cook, Vice-President
Town of Gilbert

Mayor Cathy Carlat, Secretary/Treasurer
City of Peoria

Councilmember Pat Dennis
City of Avondale

Vice Mayor René Lopez
City of Chandler

Councilmember Bart Turner
City of Glendale

Councilmember Sheri Lauritano
City of Goodyear

Councilmember Kevin Thompson
City of Mesa

Mayor Thelda Williams
City of Phoenix

Vice Mayor Lauren Kuby
City of Tempe
